TEODORA BULATOVIĆ

Software Developer · Angular · React · .NET · Camunda

Podgorica, Montenegro • +382 69 579 868 • teodorabulatovic@outlook.com

PROFESSIONAL SUMMARY

Software Developer with 6+ years of experience delivering enterprise web applications, with a strong focus on digital banking solutions for major European banks. Specialized in frontend development with Angular and Camunda BPMN process implementation, with additional experience in React and solid knowledge of backend technologies such as .NET and Node.js. Hands-on experience with end-to-end banking processes including account opening, deposits, loan origination, bank guarantees, and leasing. Currently working on projects for Raiffeisen Bank Croatia and Raiffeisen Bank Kosovo, alongside parallel contributions to monitoring systems, public administration platforms, and bot integrations. Strong advocate of clean code, teamwork, and continuous learning.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, C#
Frontend: Angular, React, Blazor, Astro
Backend: .NET, Node.js, REST APIs
Workflow & BPM: Camunda (BPMN process modeling & implementation)
Banking Domain: Account opening, Deposits, Loans, Bank guarantees, Leasing
Styling & UI: Bootstrap, Tailwind CSS, SCSS, Shadcn UI
Tools: Git, Figma, Jira
Methodologies: Agile, Scrum

WORK EXPERIENCE

Software Developer | *Current Company*
December 2021 – Present · Podgorica, Montenegro

Core project — Banking customer and agent-facing applications (ongoing since 2021):

- Developing customer and agent-facing banking applications for various European banks, focusing on the frontend layer with Angular and Camunda business process implementation.
- Delivered end-to-end digital processes including account opening, deposits, and loan origination, streamlining key banking workflows for both customers and bank agents.
- Currently working on Raiffeisen Bank Croatia — implementing the bank guarantees (letters of guarantee) process, from application intake through approval and issuance.
- Currently working on Raiffeisen Bank Kosovo — implementing the leasing process, covering application, evaluation, and contract workflow.
- Designing and implementing Camunda BPMN workflows to orchestrate multi-step banking operations, including task assignment, approvals, and system integrations.
- Collaborating closely with backend developers, business analysts, and bank stakeholders to align technical implementation with regulatory and business requirements.

Parallel projects delivered during the same period:

- React Developer on a monitoring system — delivered responsive frontend solutions using React, Tailwind CSS, and Shadcn UI.
- Travelaizer — a travel recommendation application with Astro and React on the frontend and .NET services on the backend.
- Public administration platform — contributed to robust modules built with .NET and Blazor.
- Viber bot application — designed and implemented both frontend (Angular) and backend (.NET, Node.js) components.

Software Developer | *Gaming Industry Company*
September 2019 – October 2021

- Developed a location-based mobile application conceptually similar to Pokémon Go.
- Designed and implemented location-driven functionality and interactive gameplay features.
